& Logistics

with Horizon International Cargo

## Distribution

In a fast moving and challenging world speed to market is an essential source of competitive advantage. We offer a variety of specialist and standard solutions delivered either through our own resources or by managing carefully selected partners.

Our solutions include:

### Full load transportation

We have a comprehensive variety of solutions to meet product sensitivity, size, loading and unloading constraints, as well as your time sensitive delivery commitments.

### Pallet or part-load services

Increasingly, smaller consignments delivered on a more frequent basis are being used within the supply chain as order replenishment techniques improve and inventory levels are decreased. We plan and co-operate with various specialist networks to ensure the most cost-effective and reliable solutions are always achieved.

### Express and time critical services

When products need to be dispatched immediately we are there 24 hours a day to deploy our own resources or manage external service providers, including airlines and couriers, to ensure you receive a time critical solution.

### Continental distribution

Where products are spread across Europe, the USA or Asia, Horizon has a range of services able to respond quickly to meet your planned or unplanned needs.

### Value added services

In addition to these services, we work with our customers to extend our range of supporting services. These include:

- Merge in transit
- Crane and specialist loading/off-loading services
- Temperature controlled transportation
- Small parcel deliveries
- Re-packing services

For more information about any of our services please visit our website at: [www.hicargo.com](http://www.hicargo.com)
