with Horizon International Cargo

Warehousing

We provide warehousing and supporting solutions to facilitate our customers' various supply chain requirements. Long term storage, inventory management, cross docking, emergency parts, pick/pack and transit warehousing are all part of our core services.

Storage and inventory management

We can offer a range of solutions for customers including inventory management, supported by IT and linked EDI capabilities, as well as long term bulk storage with daily, weekly or monthly replenishment.

Emergency parts

Increasingly we hold strategic inventory designed to meet our clients' emergency needs. We provide 24/7 operational coverage with full visibility of all stock and activities. This is supported by fast transport services to ensure products arrive on time, every time.

Pick and pack

Our order fulfillment services range from the very simple (single SKU) to the highly complex. Working to detailed SOPs we offer, amongst other services, kit collation, inserts, specialized product packaging, product assembly and re-labeling.

Samples management

When new products are being introduced to market we know that your ability to respond quickly and accurately is vital. We also understand that return management and product traceability will be required. This is why Horizon has been chosen to provide sample management services for many customers and why we have been able to help these customers reduce their costs by lowering loss rates and the damage to products in transit.

Value added services

Horizon works continuously to extend the range of services offered to customers. Some of the additional services we can offer include:

- Package design
- Pallet build up and breakdown
- Merge in transit
- Sorting
- In-house distribution channels

For more information about any of our services please visit our website at: www.hicargo.com
